

BK Wander Management System Server

Dedicated system server with database provides automation and performance in a compact format.

TIGHTLY INTEGRATED

The BK Server is the heart of the Kareteq Wander Management System. Its LINUX operating system, system management software, and database allow it to manage all system activity in real-time and independent of the client PCs.

INCLUDED DATABASE

All system user credential, door controller configs, and other system settings are automatically stored in the on-board database. Additionally all system events are stored in the database and available to the client PCs in real time.

HARDWARE WARRANTY FOREVER*

The BK server is entirely solid-state including the integrated M-Sata SSD; you'll get many years of use from this hardware. Server hardware warranty is extended indefinitely with a paid system software subscription. *please consult with your Authorized Kareteq Integrator for details.
