

## LFVEEZ - EXTERNAL READER

*Optional External Reader Antenna to extend Hands-free Range and Add Unsecure-side Access.*

### ADD-ON READER ANTENNA

LFveez external reader antenna further extends the detection capabilities of the Superveez Reader Controller. It's compact and can be strategically located within 30 ft of the Superveez providing maximum flexibility in configuring the detection area.

### CUSTOMIZABLE DETECTION AREA

It can increase the detection area or the shape of the detection area to suppress an unwanted area by activating unique Advveez Inhibition mode.

### WEATHERPROOF AND TAMPERPROOF

LFveez can be positioned outdoors to add unsecure-side access. As a slave antenna reader, it's tamper-proof.

### MULTI-TECHNOLOGY READER

Reading and detection capabilities are identical to the internal reader/antenna of the Superveez Door Controller including range (4-12 ft for hands-free tags) and prox card types (125KHz EM).

## SPECIFICATIONS
