

Handheld Tag & Door Tester

Check Resident Tag Battery Level and Door Controller Functionality.

TEST, STORE, & DOUBLECHECK

- Directly test resident and staff hands-free tag battery level and key door controller functions
- Test data is stored on tester for later upload to Organeez supervisory software database. Database stores test history which can be easily retrieved for reporting or archived.
- Summary mode shows which tags & doors have not been tested, so you don't miss any.

COMPACT & CONVENIENT

- Rugged, compact hand-held design with built-in rechargeable battery and back-lit display. Standard USB port for charging and data upload.
- Multiple tag and door scanning modes automate testing for systematic resident and perimeter check procedures.
