

DOOR CONTROLLER NETWORK - BASIC TOPOLOGY

*Flexible configurations to minimize wiring.
Mix wireless & wired door controller connections.*

FLEXIBLE CONFIGURATION

System and door controller topologies provide key component security, as well as wired and wireless connection options. Mix wander and secure access controllers in the same system.

DOOR CONTROLLER NETWORK - ADVANCED TOPOLOGY

Leverage an IP LAN to support larger door controller networks.

IP BACKBONE

Use IP as a backbone to support an expansive facility and across buildings. Mix & match wireless and wired door controller connections using Kareteq IP repeaters to localize connections at the point of need.
